

# MINK OIL

Family **NOURISHING PROTECTOR**  
Support : **FINE SMOOTH LEATHER**  
**OILED LEATHER & NUBUCK**

Code Tarif **1783**

## TECHNICAL FEATURES

Very rich mink oil formula, non greasy oil, penetrating, allowing to deeply nourish leather surface while softening & protecting leathers. Mink oil being the only oil used in this formulation, there is no oily & dirty surface appearance that traditional greases leave.

## CONDITIONS OF USE

Small leather pieces & fine smooth leather shoes & oiled nubuck that have to keep their natural non greasy aspect, or with possibility of being hand used.

## HOW TO USE

1. Get rid of leather dust or dirt
2. Apply cream without excess with a white cotton cloth while making sure to rub the leather in order for the mink oil to penetrate.
3. Let dry
4. Polish to eliminate residues with SAPHIR MEDAILLE D'OR cotton cloth or sheep polishing glove.

## ADVICES

Renew application regularly (a light maintenance is always better than too much at once)

Being very nourishing, mink oil can darken some leathers such as natural ones like Nappa without any protection. It is important to check compatibility with your leather by testing on a hidden part.
